The Best Bicycle Trails in Würzburg and the Franconian Wine Country

Main River Bicycle Trail

The 600-km-long Main River Bicycle Trail is one of the most popular long-distance bicycle trails in Germany. Pedaling from the two origins, the Red and the White Main, to its terminus is one of the best ways to experience this beautiful landscape.

The Franconia section of the Main River Bicycle Trail goes from Gemünden past steep vineyards to the city of Würzburg, where it meets the Main River.

The Wern River Bicycle Trail

The Wern River Bicycle Trail is a lesser known gem for active nature lovers. The trail is 78 km long and travels from the spring River to its confluence with the Main River near Gemünden-Wernfeld. The path is ideal for families or other leisure riders because there are rarely climbs and it is very well marked.

The Wern River Trail is a nice alternative to the Main River Trail, but, of course, you can always do both. The entire tour can easily be accomplished in 2 to 3 days, leaving ample time for sightseeing, visiting, and refueling. Get ready for many new impressions and experience a small piece of magical Franconia.

Don't worry, the bicycle trail travels on quiet pathways away from motorized madness and you are introduced to many experiences. There are historic old towns, medieval towns with their city gates and fortifications, Baroque pilgrimage churches, Bavarian fairy tale castles. Furthermore, you get to discover romantic river valleys and a beautiful countryside.

2-Franken Bicycle Trail

This Bicycle Trail connects the two most famous Franconian metropolises Würzburg and Bamberg via a 100 km distance. With the exception of the main through-roads, the tour proceeds on bicycle paths and by more than 90 % on asphaltic bicycle and country roads. The 2 Franken Bicycle Trail is consistently labeled with white-green signs and the red icon of the 2 Franken Bicycle Trail. Starting at Würzburg Railway Station it is an alternative to the Main River Bicycle Trail and suitable for those who do not balk at one or a few ascending slopes.
